PLATFORM

Dear partners,

TEST (Thoracic European Surgical Trials) is a European surgical clinical trials platform promoting clinical trial enrollment and execution in surgical centers across Europe. Currently more than 20 academic and non-academic large volume thoracic surgery centers are part of this platform. We wish to connect the expertise generated via the Early-stage Lung cancer International eXpert Retreat with transcontinental clinical trial development.

We are planning a multi-disciplinary KOL TEST session to develop innovative trials, novel treatment strategies, enrollment optimization, and cutting-edge translational research opportunities that will shape the next wave of surgical advancements in lung cancer care. Among world-leading experts who have already agreed to join are: Dr Brendon Stiles, Montefiore Einstein Cancer Centre; Dr David Jones, AATS President and TSOG PD; Dr Jay Lee, UCLA; Dr Cecilia Pompili, Leeds Institute of Cancer & Pathology; Dr Jarushka Naidoo, Ireland; Dr Jessica Donington, University of Chicago Medicine; Dr Paula Ugalde, Brigham and Women's Hospital; Dr Logan Walsh, McGill University; Dr Jean-Marc Baste, Rouen University Hospital.

Our effort also aims to identify and mentor promising fellows and junior faculty in the domain of surgical lung cancer trials to accompany this new generation of trials within this expert setting.

The meeting is planned in a two-day format:

- Day 1: Working groups for Stage I, II, III, IV NSCLC, perioperative care and pathways to ensure adherence to intended oncologic therapy, translational research opportunities.
- Day 2: Presentation of suggestions and vote for three projects to move forward.

When: 10-11 December 2025

Venue: Landgasthof Halbinsel Au Hotel, Zurich, Switzerland

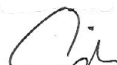

Organizers: Isabelle Opitz & Jonathan Spicer

Your support for this exclusive meeting would be highly appreciated.

Do not hesitate to reach out for further questions to:

Secretariat: Ms. Nuria Monteis: n.monteis@torrespardo.com
